

Truth 1 | Plain as Day (and Night Too)

According to the Bible, God has revealed His glorious nature in the universe He created.

1. What are some specific things in the physical world that fill you with awe? What do they tell you about the Creator?

2. How difficult is it for us to view nature (a rainbow, for example) as we once did? Does that matter? How might we restore our childlike sense of wonder at God's creation?

Truth 2 | Science Started with God

The scientific revolution began with the assumption that the world had been divinely created in an orderly way and could therefore be studied.

1. How do you feel about the fact that early science was primarily a Christian response to the world around us? How might that encourage you when you see science being used today as an argument *against* the faith?

2. In what way can scientific research be an act of worship?

3. Which early scientist(s) might you want to learn more about? You can often read their very own works, not just biographies about them.

Truth 3 | A Stronger Case Than Ever

Today we have new evidence pointing to *God's design of the universe*.

1. What are some key things we understand about the night sky that we didn't know even a hundred years ago? Which objects might you want to locate there with binoculars or the naked eye?

2. What do you think of the scientific evidence that suggests the universe has not always existed?

3. Explain in your own words what has been discovered about the inner workings of the cell and the information contained in DNA. How is this like finding a wristwatch in the field while out on a walk? What other evidences of design in nature impress you or make you want to investigate further?

Truth 4 | The Blind Eye and Deaf Ear

Modern science refuses to follow the evidence where it leads and instead treats alternative theories about the universe as fact.

1. Why did Einstein and other scientists want to believe that the world had always been here? What discovery spoiled their hopes? How do you feel about scientists who are driven more by their religious or philosophical worldview than by scientific data?

2. Suppose you were talking to someone who thought Darwin's theory of evolution explained life on earth. What evidence (or lack of evidence) in modern science would you mention to call evolution into doubt?

Wrap-Up

We've seen how fallen man ignores the plain evidence of objective scientific inquiry and promotes the atheistic philosophy of evolution primarily because he is determined to act as he pleases without answering to a higher authority.

Does this hit close to home? Are we, as Christians, sometimes inclined to live our own lives without asking the Lord for His power and direction?
