## IGNORING REALITY

### Directed Panspermia:

Theory that the first living cell must have been transported to earth from some other planet outside our solar system.

## BLIND FAITH

"Most modern biologists, having reviewed with satisfaction the downfall of the spontaneous generation hypothesis, yet unwilling to accept the alternative belief in special creation, are left with nothing. I think a scientist **has no choice** but to approach the origin of life through a hypothesis of spontaneous generation."

## BLIND FAITH

"One has only to contemplate the magnitude of this task to concede spontaneous generation of a living organism is impossible. Yet here we are, as a result. I believe in spontaneous generation."

## CHARLES DARWIN

"If it could be demonstrated that any complex organ existed which could not possibly have been formed by numerous, successive, slight modifications, **my theory would absolutely break down.**"

## DARWIN "BREAKING DOWN"

"To Darwin, the cell was a 'black box' -its inner workings were utterly mysterious to him. Now, the black box has been opened up and we know how it works. Applying Darwin's test to the ultra-complex world of molecular machinery and cellular systems that have been discovered over the past 40 years, we can say that Darwin's theory has '**absolutely broken down.**'"

**DAVID RAUP**  
 Director, Field Museum of Natural History  
 (one of the largest fossil collections in the world)

"We are now about 120 years after Darwin  
 and the knowledge of the fossil record has  
 been greatly expanded. We now have a  
 quarter of a million fossil species but the  
 situation hasn't changed much. The  
 record of evolution is still surprisingly jerky  
 and, ironically, we have even fewer  
 examples of evolutionary transition than  
 we had in Darwin's time."

**STEPHEN JAY GOULD**

"The extreme rarity of transitional  
 forms in the fossil record persists as  
 the trade secret of paleontology. The  
 evolutionary trees that adorn our  
 textbooks have data only at the tips  
 and nodes of their branches; the rest  
 is inference, however reasonable, not  
 the evidence of the fossils."

“It is absolutely safe to say that if you meet somebody who claims not to believe in evolution, that person is **ignorant, stupid** or **insane** (or **wicked**, but I'd rather not consider that).”

**IMPORTANCE OF GENESIS**

“Evolution destroys utterly and finally the very reason Jesus' earthly life was supposedly made necessary. Destroy Adam and Eve and original sin, and in the rubble you will find the sorry remains of the son of God...and if Jesus was not the redeemer who dies for our sins, and this is what evolution means, then **Christianity is nothing**.”
